**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagatsuka et al (5427644).

Nagatsuka et al teaches a process having the steps of mounting a rotary brush (114&126 and 198&210), to one side of a rotary grindstone (178), a wheel spindle (184).

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Morikawa et al (5911257).

Morikawa et al teaches a process having the steps of mounting a rotary brush (1&51), to one side of a rotary grindstone (4), and a wheel spindle.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagatsuka et al (5427644) in view of Tayebi et al (5220754) and/or Dunn (6120363).

Art Unit: 3723

- a. Nagatsuka et al (5427644) teaches the claimed process except for a brush being a wire brush.
- b. Tayebi et al (5220754) and/or Dunn (6120363) teach a process having a wire brush (Tayebi et al col.2, lines 48-55 and Dunn col.1, lines 59-60) which allows the alternative brushes.
- c. It would be obvious one having ordinary skill in the art to have modified the Nagatsuka et al device provided by a brush with wires as taught by Tayebi et al (5220754) and/or Dunn (6120363) which allows the alternative brushes.

**Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art of record.
